| **Comments**                                | - If there are too many indications for the group or the learner, the teacher can leave one or two out.  
- The teacher can also get the learner to do the exercise the other way, starting from the answers, or by creating other situations: the learner will then have to show the indications of a simple message.  
- For exercise C1/31-13, the teacher can have the learners make real posters either from the subject given or from any other subject. This can also be done on a computer. |
Here is a message:
