Florist

Well, yes, Professor Fish, I do have a wonderful job! It suits me? Well, thank you sir. You think my flowers are beautiful? They should be: I choose them most carefully in flower markets or straight from the growers. Then I re-pot, I prune, I spray against diseases and I make sure that my clients only get plants and flowers in perfect condition. Then, there's an art in arranging the display, marrying colours, shapes and perfumes, putting together plants with the same needs... I also give information to clients and advice on plant care...

I agree, you need a certain botanical expertise. Yes, you can get NVQs in Floristry, but I also got "A" levels in Business Studies because I wanted to manage a shop. You're right, it's a job where you need taste, an artistic eye and agile fingers. Yes, the shop is open all day Sunday. So, Professor Fish, you'd like a special flower arrangement for your wife's birthday?
